Absolutely the setbacks for these huge towers MUST BE at least 2 miles! Please consider property rights and safety issues, and change the current set back ordinance. Diane Redlin

I would like to see a set back of 4x the height of the tower from residences and 2x the height of the tower from road right of ways.

Subject: [EXT] No Wind Energy Systems!!

Krista,

I am writing to support increasing the WES setbacks! I do not want to see Grant County turned into a industrial wasteland. These Wind towers are a giant scam! Would you want to live by one? How about if your "neighbor" put one up in your backyard and you couldn't do a thing about it? The commissioners passed the first two CUPs without even knowing what the setbacks were or educating themselves what the permit even was. That being said, they've already let two in, that's enough, please don't let another one in!! Grant County is beautiful and we don't want to see these hideous things wrecking our skyline!

Thanks, Derek Nelson

Hi I'm Wade Bauer I'm asking your help to deny the windmill permit. I live on twenty acres in the middle of the proposed project. They are going to be way to close to my family home and will decrease my property value. This will destroy my way of life and i don't think anyone wants to live in the middle of a windmill farm DO YOU. Again please help stop the windmills from coming.

Sincerely
Wade Bauer

Subject: [EXT] Wind turbine setback

Dear Krista,

I want to go on record that I am not in favor of the present ordinance for the 1000 ft. setback for the proposed wind turbines for Grant County. I feel this is not a sufficient distance from a residence for the size of the proposed larger turbines. Property lines should be considered in determining the distance for the setback, as well as negative aspects in placing a turbine so close to a residence. I understand Clark County has determined their setback at three-fourths of a mile, which I feel is reasonable.

Thank you.
Shirley Robish

Subject: [EXT] windmill setbacks and more

I am VERY against this so called clean energy with wind towers. I have been researching these on several different towns and States. As far as a setback policy, they need to be far enough from a non-participating landowner to avoid the flicker effect and constant noise that has been compared to a jet flying overhead and never landing. As far as the participating landowners...go ahead and place them right next to their residence.

<https://vimeo.com/214526676> This is Oklahoma. South Dakota should not make the same mistake they did.

<https://www.bing.com/videos/search?q=abandoned+wind+farms&&view=detail&mid=08DDB75A0F6964ACFE8C08DDB75A0F6964ACFE8C&&FORM=VRDGAR>

Get it in writing when the subsidies are done...they don't abandon the sites but instead, maintain and continue to use? There are sites all over the USA where they abandon them and leave the eyesore behind.

Can you guarantee me that my electric bill won't go off the charts? My Brothers went up 4 times the normal cost of what he paid prior to the Windmills going up in CA. He now averages \$425 or more a month and he there are two in his home using the power.

The greed of a few are going to cost the rest of us.

Thank you
Vicki Peterson
